EXPERIMENT – 1

Aim:- Design a professional resume using templates.

	KUNAL KUMAR  Rajnandgaon, India 491661  9039787442  kunalkumardewangan125@gmail.com  https://www.linkedin.com/in/kunal-kumar-2a9512387?utm_source=share&utm_campaign=share_via&utm_content=profile&utm_medium=android_app
SUMMARY	Proactive Python Developer Intern skilled in team collaboration and effective communication. Achieved enhanced productivity through automation scripts while conducting technical research to support best practices. Eager to contribute critical thinking and problem-solving abilities to future projects.
SKILLS	• Python programming • Technical research • Team collaboration • Problem solving • Effective communication • Critical thinking • Knowledge sharing
EXPERIENCE	PYTHON DEVELOPER INTERN, 11/2025 - 12/2026 Rakesh Agarwal , Bangalore • Developed Python scripts to automate repetitive tasks, enhancing team productivity. • Collaborated with team members to gather project requirements and design effective solutions. • Conducted technical research to identify best practices in Python development.
EDUCATION AND TRAINING	Hemchand University , Durg, 08/2022 - 05/2025 Bachelor of Computer Applications: Web Development
LANGUAGES	Hindi: First Language English: A2 Elementary (A2)

EXPERIMENT – 2

Aim:- Create a Career Oriented Presentation with 7 slides using transitions and animations.

Career Opportunities After MCA

Paths, Roles & Future Scope

Navigating Your Future in Tech

*The **Master of Computer Applications (MCA)** degree equips you with advanced knowledge in computer science and its applications. It's a powerful launchpad for a dynamic career in the ever-evolving tech industry.*

Choosing the right path after your MCA is crucial. This presentation will explore diverse career avenues, helping you align your skills and aspirations with the most promising opportunities.

Unlocking Your Potential: Software Development Careers

Software Developer

Crafting applications and systems that drive innovation.

- Proficiency in programming languages (Java, C++, Python)
- Strong problem-solving abilities

Web Developer

Building dynamic and user-friendly websites and web applications.

- Expertise in front-end and back-end frameworks
- UI/UX design principles

Full Stack Developer

Mastering both client-side and server-side development.

- Versatility across the entire tech stack
- Database management skills

Harnessing Insights: Data & Emerging Technology Roles

Data Analyst

Interpreting complex data to provide actionable insights.

- SQL, Excel, data visualization tools
- Statistical analysis

Data Scientist

Developing models and algorithms to extract predictive power from data.

- Python, R, machine learning algorithms
- Advanced statistical modeling

AI/ML Engineer

Designing and implementing artificial intelligence and machine learning solutions.

- Deep learning frameworks (TensorFlow, PyTorch)
- Natural Language Processing (NLP)

Protecting the Digital Frontier: Cybersecurity & Networking

In an increasingly connected world, protecting digital assets is paramount. Cybersecurity and networking professionals are on the front lines, safeguarding systems and data.

Cybersecurity Analyst

Monitoring, detecting, and responding to cyber threats.

Ethical Hacker

Proactively identifying vulnerabilities to strengthen defenses.

Network Administrator

Managing and maintaining robust and secure network infrastructures.

Diverse Avenues: Government, Academia & Research

Government IT Jobs

Contributing to public service through technology roles in various government departments.

- Stable career paths
- Competitive examinations for entry

Lecturer/Professor

Shaping the next generation of tech professionals in educational institutions.

- Requires strong subject matter expertise
- Often involves research and publishing

PhD & Research

Deep diving into specific areas of computer science to advance knowledge and innovation.

- Focus on cutting-edge technologies
- Potential for academic or industrial research roles

These paths often require specific eligibility criteria and preparation for competitive exams.

Key Skills for a Thriving MCA Career

Beyond technical prowess, certain soft skills and continuous development are crucial for success.

Technical Aptitude

- Strong programming fundamentals
- Database management
- Cloud computing knowledge
- Operating systems

Soft Skills

- Problem-solving & critical thinking
- Communication & teamwork
- Adaptability & resilience
- Time management

Continuous Learning

- Staying updated with new technologies
- Online courses & workshops
- Industry publications & forums
- Mentorship

Enhancing Your Profile: Certifications & Experience

Strategic Certifications

• Cloud Platforms

AWS Certified Developer, Azure Administrator Associate.

• Project Management

PMP, Certified ScrumMaster for agile methodologies.

• Cybersecurity

CompTIA Security+, Certified Ethical Hacker (CEH).

• Data Science

Google Professional Data Engineer, IBM Data Scientist Professional Certificate.

Your Career Journey: A Roadmap

Your career is a journey of continuous growth. Each stage brings new challenges and opportunities for learning and advancement. Embrace the process!

EXPERIMENT – 3

Aim:- Create a social media poster for “DIGITAL AWARENESS WEEK” using canva.

EXPERIMENT – 4

Aim:- Compose & send a professional email with an attachment as “you are applying for an internship, send email to HR with your resume attached”.

Application for Python Developer Intern

Bangalore, Karnataka

Subject: Application for Python Developer Intern

Respected Sir/Madam,

I am writing to express my interest in the Python Developer role in your organisation. I have recently completed my MCA (Master of Computer Applications) and I am looking for an opportunity to begin my career in the IT industry.

During my MCA, I gained strong foundations in Java, Python, DBMS, SQL, HTML, CSS and Data Structures. I have also worked on academic projects where I learnt how to design backend logic, implement database connectivity and develop user interfaces. I am familiar with Git/GitHub, basic SDLC concepts and teamwork in group projects. I learn fast and can adapt to professional environments quickly.

I am confident that I can contribute positively as a beginner with a sincere learning attitude. It would be an honour if you consider my profile for an interview. I am ready to join immediately and would love to grow along with the organisation.

Thank you for your time and consideration.

Regards,
Kunal Kumar

EXPERIMENT – 5

Aim:- Design a complete Google Form survey and analyse responses.

The screenshot displays a Google Form titled "Student Attendance Report" in a web browser. The form is designed to track daily student attendance and feedback. The first question, "Student Name", is a short answer text field. The second question, "Current Attendance Status", is a multiple-choice question with four options: Present, Absent, Late, and Excused. The form is currently in the "Questions" tab, and the "Responses" tab shows 2 responses. The "Settings" tab is also visible. The form is published and accessible to the user.

EXPERIMENT – 7

Aim:- Using Google Drive or OneDrive.

The image displays two screenshots of the Google Drive web interface, demonstrating the steps to share a folder.

Top Screenshot: The browser shows the Google Drive interface. The left sidebar lists navigation options: Home, Activity, Workspaces, My Drive, Shared drives, Shared with me, Recent, Starred, Spam, Trash, and Storage (74.9 MB used). The main content area shows the 'My Drive' view for the 'Unit 3 Practical Work' folder. A table lists the contents:

Name	Owner	Date modified	File size	Sort
Assignment	me	3:44 PM	—	
Image	me	3:45 PM	—	
Notes	me	3:44 PM	—	

Bottom Screenshot: The same Google Drive interface is shown, but with the 'Unit 3 Practical Work' folder selected. A 'Share' dialog box is open, titled 'Share "Unit 3 Practical Work"'. The dialog shows the email 'priya.das@runqta.ac.in' entered in the 'Add people and groups' field, with a role of 'Editor'. There is a checkbox for 'Notify people' which is currently unchecked. The dialog includes 'Cancel' and 'Share' buttons.

EXPERIMENT – 8

Aim:- Identify one real phishing email : A final-year student, Aman, receives a LinkedIn message saying.

“You are shortlisted for a Remote Software Developer role at Google. Salary: ₹18 LPA. Pay ₹2,499 as verification fee. Limited seats. Pay now to confirm.”

ANSWER THE QUESTIONS :-

Q.1 What type of cybercrime is happening here?

Ans. This is a **phishing scam**, specifically a **job or employment fraud**. The scammer is impersonating a reputed company to trick the victim into paying money and possibly sharing personal information.

Q.2 List 3 red flags that show it is a scam?

Ans :-

1. Demand for a verification fee
Genuine companies never ask candidates to pay money for job selection or verification.
2. Unrealistic offer without proper process
High salary and remote role offered directly without interviews, tests, or official communication.
3. Urgency and pressure tactics
Phrases like “*Limited seats*” and “*Pay now to confirm*” are commonly used in scams to rush victims.

Q.3 What should he do to verify if a job offer is real?

Ans:-

1. Check official sources
Visit the company’s official careers website to confirm the job opening.
2. Verify the recruiter
Review the LinkedIn profile carefully for authenticity and company verification.

3. Avoid paying any fees

Never pay money for job offers; report and block such messages on LinkedIn

EXPERIMENT – 10

Aim- Ask ChatGPT OR Google Gemini to generate a 100–120-word paragraph on: “Is online learning better than offline learning for college students?”

- (a) **Run the AI-generated text through Grammarly and any plagiarism-check tool.**
- (b) **Now manually search online to check if similar sentences exist on blogs or articles.**
- (c) **Identify 2–3 biased statements in the AI answer, such as:**
 - i. **Overgeneralizations**
 - ii. **One-sided opinions**
 - iii. **Unproven claims**
- (d) **Rewrite the entire paragraph in a neutral and balanced way, using AI only for grammar suggestions.**
- (e) **Submit 3 screenshots:**
 - i. **Plagiarism check results**
 - ii. **Grammarly suggestion page**
 - iii. **Original AI paragraph vs your rewritten unbiased version**

ChatGPT Generated: - Online learning offers college students flexibility and access to a wide range of resources, enabling them to study asynchronously and balance jobs or family responsibilities. High-quality online courses can deliver structured content, multimedia, and collaboration tools that support diverse learning styles. However, remote formats can reduce spontaneous in-person interactions and make it harder to practise interpersonal skills, lab work, or hands-on projects that benefit from physical presence. Outcomes often depend on course design, student motivation, and access to reliable technology. For many students, blended models that combine online content with face-to-face sessions provide the best balance — pairing the scalability and convenience of digital learning with the social, practical, and mentoring benefits of traditional classrooms.

Rewrite: -

Online learning is an innovation in learning mode brought by the inevitability of information and communication technology. The present study highlights the benefits of online learning for students. The study was conducted as library research, where previous studies on the benefits of online learning were used as the data source. The study revealed that online learning is argued to have positively affected students' autonomy, motivation, and collaboration skills while providing flexible learning for the learners. The abundance of online sources, tools, and networking enables learners to navigate their learning. These results imply that teachers, educators, and students should embrace online learning and its supporting applications to improve learning processes and outcomes. The present study contributes to the limited literature on a general overview of online learning benefits seen from the learners' side.

EXPERIMENT – 11

Aim:- To compare AI-generated content with student-created content and understand limitations of AI.

(a) Write a 100–150-word paragraph on the topic: “Will AI replace jobs or change them?”

(This must be written by the student.)

(b) Ask any AI tool (ChatGPT/Gemini/Copilot) to write the same topic.

(c) In your practical copy, create a Comparison Table with the headings:

i. Human-Generated Content ii.

AI-Generated Content

Hand Writen -:

“Will AI replace jobs or change them?”

As we live in the era of AI, the most asked question is whether AI will replace our jobs. My answer to this question is that as we progress through new technology and the era of innovation, an AI will more likely change the job rather than replace it. While AI can do lots of work in a very small amount of time without getting tired, some jobs require human creativity, emotional intelligence, critical thinking, and moral judgment—skills that AI doesn't have. For example, AI can quickly analyze medical data that is necessary for human doctors to make accurate diagnoses, provide patient care, and inform decision-making. AI is a tool that can help us do our tasks in a much more efficient and productive way. AI will reduce some low-skill jobs, creating challenges for workers. However, it will create new jobs such as AI development, data analysis, cybersecurity, and AI ethics. Overall, AI will not replace our jobs; it represents the shift in the nature of work, making adaptability and continuous learning much more important than ever.

The screenshot displays the Grammarly Plagiarism Checker interface. At the top, the Grammarly logo and navigation links (Product, Work, Education, Pricing, Resources) are visible. Below the navigation bar, the 'Plagiarism Checker' tab is selected. The main heading is 'Plagiarism Checker', followed by a subheading: 'Ensure every word is your own with Grammarly's AI-powered plagiarism checker, which uses advanced AI to detect plagiarism in your text and check for other writing issues.'

The interface shows a sample text on the left and the 'Plagiarism Checker results' on the right. The sample text is a paragraph about AI's impact on jobs. The results section shows a red circle with the number '4' and the message: 'We didn't find any plagiarism, but we found 4 writing issues.'

Issue Type	Count	Status
No plagiarism found	0	✓
Spelling	0	✓
Conciseness	1	✗
Word choice	1	✗
Grammar	0	✓
Punctuation	0	✓
Readability	0	✓
Additional issues	2	✗

At the bottom, there are buttons for 'Scan for plagiarism', 'Upload file', and 'Get Grammarly It's free'. A word count of '177/1500 words' is also displayed.

Impact of AI on Jobs

Will AI replace jobs or change them?"

AI is more likely to **change jobs** than simply replace them. While automation will eliminate certain routine tasks, it will also create new roles, demand new skills, and reshape how work is organized. ¹ ²

Key Insights

- Job Displacement:** AI is already automating repetitive, low-skill tasks in industries like manufacturing, retail, and customer service. This means some jobs will disappear or shrink in scope. ²
- Job Creation:** At the same time, AI is fueling demand for new roles in areas such as data science, cybersecurity, AI ethics, and human-AI collaboration. ²
- Transformation of Skills:** Workers will need to adapt by learning digital, analytical, and creative skills. Lifelong learning and retraining will become essential. ²
- Multiple Futures:** The World Economic Forum outlines four possible scenarios for 2030, ranging from widespread disruption to balanced augmentation, depending on how fast AI develops and how institutions respond. ¹ ³

Ask anything

Smart

+ 68

Impact of AI on Jobs

how fast AI develops and how institutions respond. ¹ ³

Comparison: Replace vs. Change

Aspect	Replace Jobs	Change Jobs
Nature of Work	Routine, repetitive tasks automated	Human roles augmented with AI tools
Examples	Factory line workers, cashiers, call center agents	Doctors using AI diagnostics, teachers using adaptive learning platforms
Impact on Workers	Job loss, need for retraining	Skill evolution, higher productivity
Economic Effect	Risk of inequality if reskilling fails	Potential for innovation and new industries
Policy Needs	Safety nets, unemployment support	Education reform, lifelong learning programs

Sources: ¹ ² ³

Impact of AI on Jobs

Risks & Challenges

- Unequal impact:** Low-skilled workers are more vulnerable to displacement.
- Skill gap:** New jobs often require advanced technical knowledge, leaving some behind.
- Institutional readiness:** Without strong policies, AI could deepen inequality instead of driving inclusive growth. ¹ ²

Big Picture

AI won't simply wipe out jobs—it will **reshape the labor market**. The real question is whether societies invest enough in retraining, education, and inclusive policies to ensure workers can transition into new roles. If managed well, AI could boost productivity and create opportunities; if neglected, it could widen social divides.

Would you like me to break down **which industries are most at risk vs. most likely to grow** under AI, so you can see the practical impact more clearly?

1 biztechweekly.com

2 Allied Business Academies

3 reports.weforum.org

Comparison: Machine-Generated vs. Manual Writing

Criteria	AI-Created Content	Hand-Written (Human) Content
Main Argument	Contends that AI will transform careers rather than eliminating them	Shares a similar perspective but through a personal lens
Tone of Writing	Professional and scholarly	Casual and chatty
Tone & Voice	Detached and objective	Contains individual viewpoints
Phrasing	Brief and symmetric	Somewhat extended with slight redundancy
Grammar Precision	Extremely precise	Generally correct
Illustrations	Broad and educational	Story-based and typical of a learner
Feeling	Lacks deep emotion	Has a distinct personal connection
Impartiality	Unbiased and even-handed	Tends to rely on personal beliefs
Authenticity	Standard or robotic	Genuine and organic
Test Usage	Useful for study material	Perfect for written tests

EXPERIMENT – 12

Create a new Notebook LM project titled: “My Chapter Revision Notes.”

(a) Upload multiple sources (any 2) such as:

- i. PDF notes
- ii. Web articles
- iii. Text copied into Notebook LM

(b) Ask Notebook LM to:

- i. Create a combined study guide using all sources.
- ii. Generate flashcards for quick revision.
- iii. Create a concept map or explanation

of the topic. Manually check for:

- i. Any incorrect facts
- ii. Repeated information
- iii. Missing important

points Attach 3 screenshots from Notebook LM:

- I. Combined study guide
- ii. Flashcards
- iii. Concept map / explanation

I. Combined study guide :-

ii. Flashcards

The screenshot shows the Google NotebookLM interface. On the left, a sidebar contains icons for Sources, Notes, Study Guide, and Flashcards. The main content area is titled "Study Guide" and displays a document titled "Combined Study Guide: Online vs. Offline Learning". The document is divided into three sections: "1. Online Learning Advantages", "2. Offline Learning Benefits", and "3. Key Differences". A flashcard overlay is visible, asking "What is a primary benefit of online learning regarding schedule?" with a "Reveal Answer" button.

Concept Explanation

Concept Map: Learning Models

I. Learning Models

- A. Online Learning
 - 1. Characteristics (Asynchronous, Remote)
 - 2. Pros (Flexibility)
 - 3. Cons (Less Social)
- B. Offline Learning
 - 1. Characteristics (Asynchronous, Remote)
 - 2. Pros (Flexibility)
 - 3. Cons (Less Social)

II. Learning Models

- A. Online Learning
 - 1. Characteristics (Asynchronous, Remote)
 - 2. Pros (Flexibility)
 - 3. Cons (Less Social)
- B. Offline Learning
 - 1. Characteristics (Asynchronous, Remote)
 - 2. Pros (Flexibility)
 - 3. Cons (Less Social)

EXPERIMENT – 13

Aim- Create a complete Student Result Management workbook.

(a) Create a new workbook with 3 sheets renamed as:

- i. Student Data
- ii. Marks Analysis
- iii. Charts

(b) In Student Data, enter a list of 15 students with:

(c) Name, Roll No, Class, City, Subject1, Subject2, Subject3.

(d) Use Flash Fill to split “Full Name” into “First Name” and “Last Name”.

(e) Use Find & Replace to replace city name “Delhii” with correct “Delhi”.

(f) Use IF function to calculate Pass/Fail (Pass = total $\geq$ 120).

(g) Use COUNTIF to find how many students belong to “Delhi”.

(h) Use AVERAGE, MAX, MIN to analyse marks in the Marks Analysis sheet.

(i) On the Charts sheet, create:

- i. A Bar Chart showing marks of any one subject.
- ii. A Pie Chart showing percentage of pass vs fail.

(j) Apply Conditional Formatting to highlight marks < 40 in red.

(k) Convert the table into a formatted Excel Table.

Full Name	Roll No	Class	City	Subject1	Subject2	Subject3	Total	Result
Amit Sharma	101	12	Delhi	45	50	60	155	Pass
Rahul Verma	102	12	Mumbai	35	40	38	113	Fail
Priya Singh	103	12	Delhii	70	80	75	225	Pass
Sneha Gupta	104	12	Delhi	88	90	92	270	Pass
Rohan Das	105	12	Pune	25	30	28	83	Fail
Vikram Malhotra	106	12	Delhii	60	65	70	195	Pass
Anjali Mehta	107	12	Mumbai	95	92	89	276	Pass
Karan Johar	108	12	Delhi	40	42	45	127	Pass
Pooja Hegde	109	12	Delhii	30	35	20	85	Fail
Suresh Raina	110	12	Chennai	55	60	58	173	Pass
Tina Datta	111	12	Pune	72	68	74	214	Pass
Manish Paul	112	12	Delhi	38	39	41	118	Fail
Kapil Sharma	113	12	Mumbai	85	80	82	247	Pass
Varun Dhawan	114	12	Delhii	45	48	50	143	Pass
Alia Bhatt	115	12	Chennai	90	95	98	283	Pass

Subject	Average	Max	Min	Result	Count
Subject1	58.2	100	40	Pass	11
Subject2	60.93	100	40	Fail	4
Subject3	61.33	100	40		

EXPERIMENT – 14

Aim- Build a workbook for managing and analyzing sales data of a small store.

(a) Create a workbook with sheets:

i. Store Sales

ii. Summary

(b) Import a CSV sales file (or create a sample table) containing: Date, Product, Category, Quantity, Price, Total Sales.

(c) Use Sort (A→Z, Z→A) to organize products by name and category.

(d) Apply Filter to view only “Electronics” category.

(e) Use SUMIF to find total sales for a selected product (e.g., “Headphones”).

(f) Use LEFT, RIGHT, MID to extract:

i. First 3 letters of the product name

ii. Last 2 letters of the category

(g) Find the highest and lowest sales value using MAX/MIN.

(h) Prepare a monthly sales summary in the Summary sheet using AVERAGE & SUM.

(i) Create a Line Chart of month-wise total sales in the Charts sheet.

(j) Apply sheet protection so data cannot be edited accidentally.

Date	Product	Category	Quantity	Price	Total Sales	Prod_First3	Cat_Last2
2025-01-05	Headphones	Electronics	5	1500	7500	Hea	cs
2025-01-12	Mouse	Electronics	10	500	5000	Mou	cs
2025-02-03	Notebook	Stationery	20	80	1600	Not	ry
2025-02-18	Keyboard	Electronics	7	1200	8400	Key	cs
2025-03-10	Pen	Stationery	50	20	1000	Pen	ry
2025-03-22	Speaker	Electronics	4	2500	10000	Spe	cs

Metric	SUM of Value
Highest Sale	10000
Lowest Sale	1000
Total Sales (Headphones)	7500
Grand Total	18500

Month-wise Sales

Month	SUM of Monthly Total
Feb	1600
Jan	12500
Mar	9400
Grand Total	23500

EXPERIMENT – 15

Aim:- Create a complete personal financial planner workbook.

Create and rename sheets as:

- Expenses
- Budget
- Charts

Enter at least 20 rows of expense data:

Date, Category, Expense Detail, Amount, Payment Method.

- Use Data Validation dropdown to create a category list (Food, Travel, Fees, Shopping, Other).**
- Use Remove Duplicates on the Category column if repeated incorrectly.**
- Use SUMIF to calculate total spending for each category.**
- In the *Budget* sheet, create the monthly budget and compare with actual expenses using:**

Difference = Budget – Actual (formula required)

- Highlight expenses above ₹2000 using Conditional Formatting.**

g. Create:

i.A Pie Chart showing category-wise spending

ii.A Bar Chart comparing *Budget vs Actual*

iii.Use Flash Fill to separate date into Day / Month / Year if needed. Also explain its detail

iv.Save worksheet in Page Layout view and adjust print area.

Date	Category	Expense Detail	Amount (₹)	Payment Method	Day	Month
02-01-2025	Food	Lunch	250	Cash	2	1
03-01-2025	Travel	Bus Pass	1200	UPI	3	1
05-01-2025	Fees	Exam Fee	3000	Card	5	1
06-01-2025	Shopping	Books	1800	UPI	6	1
07-01-2025	Food	Dinner	450	Cash	7	1
08-01-2025	Travel	Cab	2200	UPI	8	1
09-01-2025	Other	Recharge	399	UPI	9	1
10-01-2025	Shopping	Shoes	3500	Card	10	1
11-01-2025	Food	Snacks	150	Cash	11	1
12-01-2025	Fees	Course Fee	5000	UPI	12	1
13-01-2025	Travel	Train	1800	Card	13	1
14-01-2025	Other	Internet	999	UPI	14	1

15-01-2025	Food	Groceries	2200	Cash	15	1
16-01-2025	Shopping	Clothes	2700	Card	16	1
17-01-2025	Travel	Fuel	2000	Cash	17	1
18-01-2025	Fees	Library Fee	1200	UPI	18	1
19-01-2025	Food	Breakfast	120	Cash	19	1
20-01-2025	Other	Medicine	650	Cash	20	1
21-01-2025	Shopping	Bag	1900	UPI	21	1
22-01-2025	Travel	Auto	300	Cash	22	1

Category	Budget (₹)	Actual (₹)	Difference (₹)
Food	4000	3340	660
Travel	10000	9500	500
Fees	10000	9200	800
Shopping	12000	11900	100
Other	5000	3048	1952

Chart showing category-wise spending

The expense data, consisting of 20 transactions, shows a total spending of 31,818 with an average transaction amount of 1,590.9. The analysis of this data reveals key patterns in how money is spent and which payment methods are most frequently used.

Key Takeaways from Expense Analysis

1. Spending is Highly Concentrated in a Few Categories

The top three categories, Shopping, Fees, and Travel, account for over 83% of the total recorded expenses, indicating where the majority of the budget is allocated.

- Shopping is the highest spending category, totaling 9,900.
- Fees is the second largest category at 9,200, which includes significant one-time payments like the Exam Fee (3,000) and College Fee (6,000).
- Travel follows with 7,500, mainly driven by major costs such as the Flight Ticket (5,000).
- Food expenses are a smaller portion of the total, amounting to 3,170.

1. UPI and Card Payments Dominate Transactions

Digital payment methods like UPI and Card are the primary ways expenses are settled, representing over 80% of the total amount spent.

- UPI is the most preferred payment method, accounting for the largest total expenditure of 14,698.
- Card payments are the second most used, with a total of 11,000 spent.
- Cash is used for the lowest total amount, at 6,120, suggesting a preference for digital transactions, potentially for larger amounts.

The following charts illustrate the distribution of expenses:

Total Expense by Category

This bar chart shows the total amount spent in each expense category, clearly highlighting Shopping, Fees, and Travel as the largest contributors to overall spending.

Total Expense by Payment Method

This chart visualizes the total amount spent using each payment method, demonstrating the

dominance of UPI and Card payments.
